Proven results!
EPS has been manufacturing pre-engineered buildings for agricultural markets since 1981. Our years of experience manufacturing building systems stands behind each of our livestock buildings. EPS has a network of over 350 independent authorized dealers across the U.S., each one trained and ready to build your project.

Since 1981—Simply Better Buildings!
Advantages of Mono-slope

*Improved performance*
- Improved finished weights
- Improved rate gain and feed efficiency

*Cattle friendly*
- Shelter from extreme weather
- Shade in summer
- Natural ventilation

*Improved operations*
- Better working conditions
- Easier manure containment and management
- Fits deep pit, deep pack bedded or scraper/flush

*Custom design and engineering*
- Snow loads to meet or exceed building codes
- Withstands 90 MPH in a B-exposure
- Any length or width to fit your needs

Building Options

*Clear span or interior columns*
  - For wide widths

*Roof support*
  - Open web trusses
  - Glue-lam beams
  - Nail-laminate column

*Roof insulation*
  - Drip Stop
  - Bubble pack
  - Solar Guard
  - Tuff Roll

*Accessory buildings*
  - Hay and commodity barns
  - Cattle sorting and handling
  - No job too big or too small

---

“We were very impressed with the new laminate-style trusses. They create a very "clean" appearance with very few places for birds to roost. Overall, a very impressive building package. In addition, many of the visiting cattlemen who have toured the barns were also impressed with the overall appearance and design. We're planning on putting two more barns up in 2012!”
